

Snwolley Documentation

Creating an Agent on Snwolley

1. Access the agents page:
 - Click on your profile picture in the navbar
 - Select 'My Organization'
 - After creating the organization, click on the bot button
2. Create an agent:
 - Fill in the agent creation form
 - Choose a training option:
 - Knowledge base: Upload documents to serve as the agent's knowledge base
 - Data source: Connect a database to the agent
 - No training: Agent uses its default training data
3. Set agent accessibility:
 - Private: Only the creator has access
 - Public: All Snwolley users can see and access the agent
 - Note: Users can be granted access to private agents
4. Engaging an agent:
 - Type '@' in the text area to see a list of available agents
 - Select an agent to engage with it
 - The selected agent remains active until a new one is chosen or a new chat is created

Chat Widget Integration

Snwolley offers a chat widget for integration into websites and applications.

1. Prerequisites:
 - Business subscription is required to generate an API key
2. Integration steps:
 - Copy the code from the documentation page
 - Enter your parameters, including the agent ID (found in the agents table on the agents page)
 - Implement the widget in your website or application
